---

## PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience building and deploying end-to-end web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Experienced in converting Figma designs into pixel-perfect, responsive UI components and integrating REST APIs with JWT-based authentication. Comfortable managing the full deployment lifecycle from local development to production including VPS setup, domain configuration, DNS management, and SSL installation on Hostinger. Experienced in leveraging AI-assisted development tools such as Cursor AI and ChatGPT to streamline development workflows, accelerate debugging, and improve productivity and solve technical challenges faster.

## TECHNICAL SKILLS

|                   |                                                                                                                |
|-------------------|----------------------------------------------------------------------------------------------------------------|
| Frontend          | React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Web Design                                     |
| Backend           | Node.js, Express.js, REST API Integration, JWT Authentication, Java, JDBC                                      |
| Databases         | MongoDB, MySQL, Supabase                                                                                       |
| UI/UX Design      | Figma, Wireframing, UI Design, UX Design, Figma-to-Code Conversion, Pixel-Perfect Implementation               |
| Deployment        | Hostinger VPS, Hostinger Cloud, Domain Configuration, DNS Management, SSL Configuration, Production Deployment |
| Tools             | Git, GitHub, VS Code, Postman, Chrome DevTools, Eclipse                                                        |
| AI & Productivity | ChatGPT, Cursor AI, AI-Assisted Development, Prompt Engineering                                                |

---

## WORK EXPERIENCE

### Full Stack Web Developer · Yoi Media

Sep 2025 – Present

- ▶ Build and maintain responsive web applications using React.js, Node.js, Express.js, and MongoDB, delivering production-ready features across the full stack.
- ▶ Convert Figma designs into pixel-perfect, cross-browser-compatible UI components, maintaining visual consistency across desktop and mobile screen sizes.
- ▶ Integrate RESTful APIs with JWT-based authentication into React.js frontend applications, improving application security and user session management.
- ▶ Deploy and manage web applications on Hostinger VPS, handling DNS configuration, SSL certificate setup, and production environment management.
- ▶ Use Cursor AI and ChatGPT to speed up development workflows, debug issues, and improve code quality during feature development.

### Full Stack Web Developer · Taicoon Fashions Pvt Ltd

Jun 2025 – Aug 2025

- ▶ Developed dynamic, mobile-first web pages using React.js and JavaScript, improving UI responsiveness and consistency across multiple device types.
- ▶ Translated Figma design mockups into functional, production-ready frontend interfaces, ensuring pixel-accurate implementation of provided designs.
- ▶ Participated in full development cycle including local development, testing, debugging, and deployment of web application features.
- ▶ Managed code versioning and collaborated with team members using Git and GitHub, maintaining organized feature branches and commit histories.

- ▶ Performed data analysis tasks to extract insights from business datasets and contributed to performance reporting for the media team.

---

## PROJECTS

### Ops Tracker — Full Stack Web Application

**Stack:** *React.js, Node.js, Express.js, MongoDB, JWT Authentication, Hostinger VPS*

- ▶ Developed a full-stack web application for operations tracking, enabling users to log, view, and manage tasks through an interactive React.js interface.
- ▶ Built a Node.js and Express.js REST API backend with JWT authentication, securing access to user-specific data and protected routes.
- ▶ Designed and implemented a responsive, user-friendly UI in React.js with reusable components and clear navigation flows.
- ▶ Deployed the application on Hostinger VPS with domain setup, DNS configuration, and SSL installation for a secure, production-ready environment.

### Credit Card Fraud Detection

**Stack:** *Python, Machine Learning, AdaBoost, Data Analysis*

- ▶ Applied AdaBoost ensemble learning techniques to a transaction dataset to classify fraudulent versus legitimate credit card activity.
- ▶ Performed data preprocessing and feature engineering to improve model accuracy and reduce false positives in fraud classification.

### Used Cars Price Prediction

**Stack:** *Python, Machine Learning, Feature Engineering*

- ▶ Built a supervised machine learning model to predict used car prices based on vehicle attributes and historical market data.
- ▶ Conducted exploratory data analysis and applied feature engineering techniques to improve prediction accuracy of the regression model.

---

## EDUCATION

### Bachelor of Engineering — Computer Science

2021 – 2025

Annamacharya Institute of Technology and Sciences, Hyderabad, TS | GPA: 7.4 / 10

### Intermediate

2019 – 2021

Alphores JR College | Karimnagar, TS | GPA: 9.1/10

---

## ADDITIONAL INFORMATION

- ▶ Available for Full Stack Developer, React.js Developer, MERN Stack Developer, Frontend Developer, and UI/UX Developer roles.
- ▶ Experience working in collaborative, cross-functional development environments with version control and team-based Git workflows.
- ▶ Languages: English (Professional), Telugu (Native), Hindi (Conversational).
